With a proactive safety culture, proper planning, procedures and training, most injuries can be avoided. Fewer claims mean reduced insurance costs and greater company profitability.

Researching federal and state OSHA regulations and finding solutions that keep employees safe takes more time than most companies can spare. GoSafe solves this dilemma by providing free access to safety and HR resources.

Once a policy is issued, a welcome email containing a unique username and password is automatically sent to the policy contact. Be sure to look for the GoSafe welcome email from Atlas General Insurance (rminfo@mail-app.lossfreerx.com).
